

Features:

Fomblin® vacuum pump fluids are non-flammable, chemically inert and thermally stable. When used with proper pump filtration, Fomblin® PFPE fluids provide exceptionally long service life. These fluids have excellent lubricity properties and are available in viscosity grades suitable for use in all vacuum pumps. Other container sizes and grades are available on special request.

- Non-Flammable
- Safe for Oxygen Service
- Resists Attack by Corrosive Gasses
- Low Vapor Pressure
- Extended Service Life

Cross reference:

Hewlett Packard Krytox (#6040-0730)

Specifications:

Vapor Pressure @ 20 °C:	2 x 10 ⁻⁶ torr
Viscosity @ 20 °C (cst):	168
Viscosity @ 100 °C (cst):	8
Pour Point:	-45 °C
Flash Point:	None
Fire Point:	None
Boiling Range:	>250 °C
Density:	1.89 g/mL
